

Revision List - iGCSE

The first tip to doing well on the iGCSE exam - you must learn to use your calculator effectively.

You are allowed to use a calculator in **both exam papers** - USE IT!!!

Here are your key topics - perfect them...

| Key iGCSE Topics | Tick |
|---|------|
| Place Value | |
| BIDMAS | |
| Symmetry | |
| Reflections/Translations | |
| Coordinates | |
| Interpreting/Drawing charts and graphs | |
| Identifying 2D and 3D shapes | |
| Area of squares, rectangles and triangles | |
| Simple probability | |
| Mean/Median/Mode | |
| Sequences | |
| Expanding brackets | |
| Collecting like terms | |
| Angle rules | |
| Convert between/order fractions, decimals and percentages | |
| Fractions/Percentages of amounts | |

These topics almost always come up on one of your exam papers.

Remember...

- Don't drop any marks up to the staples - the easy questions are at the start of each exam paper; make sure you maximise your marks in the first half of each paper.
